

AQUIFER CONDITIONS

Well Name: ST-1-630

Hydraulic Conditions: Apparent confined

Pertinent Observations: Drilled mud rotary to 380', by 06/22/92. Drilled air foam rotary from 380'-503' on 06/24/92. First show of formation water not noted while drilling, but remaining two wells in cluster first produced between 460'-485'. Drilled mud rotary 503'-698'. Could not take an accurate water level until well was developed due to mud in borehole. Static was 432.36' on 07/30/92.
